

A robust ecosystem of digital disbursement capabilities

Designing an effective digital disbursement program is complex. It requires assembling the right technical capabilities while addressing factors such as risk, compliance, accessibility, and user experience.

To simplify this process, Visa can help governments access a broad set of capabilities and partners to address these challenges.

Operations

Support for the program's design and implementation, such as developing a business case, assessing risk, and creating a digital ID and onboarding process

Solutions

Digital payment solutions and value-added services to help streamline operations, provide a user-friendly experience, and offer financial tools and education for constituents

Communications

Education and outreach to help ensure recipients are equipped to use digital payment methods, as well as monitoring of program usage to support its optimization

Through the [Visa Ready partnership program](#), governments can connect with Visa-certified technology providers, program managers, and trusted advisors to help modernize their social protection and disbursement programs.

See how governments can transform public disbursements with digital payment options.
